

Company

Qualcomm

Qualcomm is a FORTUNE 500® company and a global leader in developing and delivering next-generation wireless technology. Ranked among the “100 Best Companies to work for,” Qualcomm innovates new ways to communicate. Headquartered in San Diego, California, Qualcomm partners with network operators, device and infrastructure manufacturers, application developers and content providers around the world to improve people’s lives through wireless communications. Through the corporate values of Innovation, Execution and Partnership, Qualcomm is spearheading the evolution and growth of 3G wireless with more than 7,000 patents and patent applications for CDMA, WCDMA and related technologies. Qualcomm employs over 15,000 smart and creative individuals around the globe. If this inspires you and you’d like to join others who share your passion for innovation, explore a career at Qualcomm.

Job Title

Intern - Sales Forecast Analyst

Location

California - San Diego

Responsibilities

Conduct statistical forecasting studies for complete family of QCT semiconductor parts, in support of Sales Forecast function. Analyze variation in forecast accuracy and ship estimate accuracy along various dimensions of our products, such as customer, geography, technology, functionality, method of inventory management, and planning horizon.

Qualifications

Strong background in economics and statistics is required, with emphasis on time series analysis and forecasting/prediction. Familiarity with statistical forecasting software such as Forecast Pro, SAS, SPSS, or ISIS would be a significant plus, as would successful completion of several projects using such software, either in academia or industry. Experience in industry with demand forecasting/demand management as part of a regular Sales & Operations Planning process within a Sales, Operations, or Supply Chain Management function would be a further plus, although it is not mandatory for an otherwise high-quality candidate.

Education Requirements

The qualified candidate will be pursuing a Bachelor's degree (Master's preferred) with solid GPA (minimum 3.5/4.0) majoring in economics, statistics, operations research, or industrial engineering. Coursework should include heavily quantitative subjects such as economics, statistics, econometrics, time series analysis, economic forecasting/prediction, etc.
